# RÖNKKÖ SON OF TUONI

THE UNDERWORLD WATCHMAN

## THE GUARDIAN OF THE DEAD

*"Nobody is to leave Tuonela. Nobody" –says Tuonen Poika, the Underworld's Son of Death.*

**While grabbing iron and copper threads, he weaves a thousand nets to cast across the waters of the river of Tuonela. In doing so, he creates a defense system over the coast of the Deadland, Manala, that will endure until the end of time.**

**His parents, the gods of the Finnish Underworld, revel in the unlimited potential of their progeny.**

*"Nobody will ever leave Tuonela with Tuonen Poika as the Watchman," says Tuonetar with pride.*

## THE PROTECTOR'S STRENGTH

Tuonen Poika **has faced shamans, mages, and warriors who wish to be brought back to life.**

**Unwaveringly, he grabs his sword firmly, ready to keep the Watergates of Tuonela together —just as a Rönkkö masterpiece holds perfectly on the wrist of its owner.**

**Inspired by the legendary Son of Tuoni, this handmade creation is designed in Finnish Silence to serve you for a lifetime. To guide you, to protect you. With the strength of the godly Watchman.**

## THE VICTORY OVER THE SHAMAN

**Although disturbing, these guardians were in essence Watchmen and Protectors.**

**When the Swan of Tuonela was in peril, the Son of Tuoni came forth to protect her.**

**Unthreatened by the famous shaman-warrior Lemminkäinen, the Underworld Gatekeeper wielded his mighty sword and sent the shaman to his doom.**

**The legend of the impassable passage remains alive to this day. Tuonen Poika, the undefeated Watchman of the Underworld, remains vigilant on his duty for eternity.**

THE UNDERWORLD WATCHMAN

## MOON COMPLICATION

Introducing the enhanced Moon Complication, an exquisite marvel of horological engineering that *tracks* the full moon (bright) phases with unparalleled precision and elegance.

The Dual Moon version also *displays* the new moon (black moon) phases or can be *configured* to *show* two full moons (bright) or two new moons (black moon).

Here's how to *calibrate* and *synchronize* your timepiece.

## UNDERSTANDING THE LUNAR CYCLE

The Moon Complication *elegantly displays* the moon at the 12 o'clock position.

The Dual Moon Complication version with a new moon also *shows* the new moon (black) on the opposite side of the full moon (bright).

The moon symbol/symbols *rotate* polar with the center of the dial, *showing* at 12 o'clock the phase of its/their cycle.

The rotation is *counterclockwise*, with the period between the same color moons being 29.5 days, the standard length of a lunar cycle.

## INITIAL CALIBRATION

To *access* the manual time setting mode, *pull the crown out two position*.

*Advance the hands* past 12 o'clock (midnight) until you *witness* the desired moon symbol *leaps* counterclockwise twice (versions 1-3) and (versions 4-5) it *leaps* only once.

*Continue turning* the hands clockwise *stopping* anywhere between positions 10 and 14.

*Limited Edition 20 pieces*

# RÖNKKÖ SON OF TUONI

THE UNDERWORLD WATCHMAN

## SETTING THE MOON PHASE

*Push* the crown one step into the case for fast adjustment mode.

*Rotate* the crown counterclockwise until the desired moon symbol perfectly aligns with the 12 o'clock.

## SYNCHRONIZATION WITH LUNAR CALENDAR

*Consult* the lunar calendar for the current year

and *find out* the number of days since the last full moon or new moon.

*Rotate* the crown to set the correct moon time, so that the desired moon symbol leaps

twice per day (versions 1-3) and (versions 4-5) only once per day.

## PRECISE TIME SETTING

*Pull* the crown to adjust the time in the usual manner.

*Remember* that if you've turned the hands past midnight, they are in the AM period.

For instance, if it's 8 PM, *rotate* the hands past 12 noon

and then *proceed to set* them to 8 o'clock to ensure accurate moon phase changes.

## FINALIZATION

Once adjustments are complete, *push* the crown back into the case to secure the settings.

With these meticulous steps, your Moon Complication *will* flawlessly *synchronize* with the lunar rhythms, *embodying* the pinnacle of mechanical craftsmanship and celestial harmony.
